JULY 2019 NEWSLETTER

After 17 months of renovations to the race track the 2019 racing season kicked off with Test and Tune on April 20th, followed by our season opener of the George "Flintstone" Andrade Memorial Day Weekend drags, May 24th-26th.

Many of you who attended the past three events (June 22nd included) either as a spectator or racer, have noticed changes to the facility. Thanks to the many volunteers that came out on weekends or almost daily we can all enjoy the new paved entrance and exit lanes, designated concession area on the spectator side, a new ticket booth, timing system and starter shack, and most of all a newly paved track. The change in the new traffic system will take a little time getting used to, so adhere to the posted signs as more improvements are in the works. Just a heads up that one of the changes will be the installation of a "tiger tooth" at the end of the exit lane to prevent drivers from trying to illegally enter the park through the exit....**puka tires!**

VITA board of directors hope you enjoy the newly renovated facility and continue attending our racing events.

Let's Go Racing!
